Full details of each of these graduation ceremonies will be published in next week's special Graduation edition of The Record.

Red Cross Aids In Locating Refugees

Miss Helen Percy Chesebrough, vice-chairman of the San Mateo County Chapter, American Red Cross, stated this morning that the National Red Cross is in a position to assist local residents in contacting their relatives in Europe who have been forced to leave their homes as a result of present conditions.

"The necessary information blanks are available at the Red Cross office, 224 Primrose road, Burlingame," says Miss Chesebrough, "and we will be happy to assist anyone in preparing them. The blanks are forwarded to National headquarters at Washington and from there are sent by Clipper to Europe. Although the Red Cross cannot promise success in locating families among the refugees, everything possible is done to facilitate this search."

Police Apprehend Youthful Thief

Still wearing the suit and jacket he had stolen Sunday from Dan's cafe, 6860 Mission street, a young Massachusetts seaman appeared before Judge Wade H. Clay's court, Friday, to plead guilty to a charge of burglary.

The case was one of the most dramatic hearings to be held in Daly City in recent months. In simple and straight-forward style the 22-year-old youth, George Brodeur, recounted how he had been given a job by the proprietor of the restaurant Friday evening, and how, when left alone on Sunday evening, he had robbed his employer.

"I broke into his living quarters," recounted Brodier in a quiet, strained voice, " and made off with some clothes and money. The police got me at Salinas. I had hitch-hiked to San Jose and caught a bus for San Pedro. The police identified me by a scar on my hand.

"I was returned here Tuesday afternoon by the Daly City police and questioned. Wednesday morning I was taken to Redwood City, talked with the district attorney, and went to the county jail."

The boy's story corresponded closely to previous testimony given by Dan Kavanaughs, proprietor of the restaurant, and James G. Reardon, chief of the Daly City police force.

Kavanaughs said he had given Brodeur a job after the youth had asked for a cup of coffee.

Sunday afternoon Kavanaughs went to the show, he said, and when he returned in the evening he found the bolts to his door forced, his room ransacked, several items of clothing missing and a wallet gone, which contained between $25 and $50.

Chief Reardon continued the story by informing the court that his office had received a report on the robbery at 9:15 p. m., Sunday, and immediately sent out a broadcast of the youth's description.

The quick action of Daly City police in sending a teletype to Salinas and San Louis Obispo resulted in the youth being apprehended in Salinas. Police there stopped the south-bound bus and took Brodeur into custody.

Tuesday morning Chief Reardon and Officer Joseph Kusber went to Salinas and returned the prisoner here for questioning. The youth confessed readily to the theft, Reardon said.

Judge Clay set the bail at $500 cash, in default of which Brodeur was committed to the custody of the county sheriff to await trial before superior court in Redwood City.

D. C. Police Place Hit-Run Charges

Property damage and hit-and-run charges were placed against Haskell Allen Harris, 423 Commercial street, South San Francisco, Friday afternoon by Daly City police.

Harris's car crashed into the rear of an automobile driven by Tito Alimenti, 786 Arkansas street, San Francisco, in an accident here Thursday morning, according to Police Chief James G. Reardon. It was Daly City's only Memorial Day accident.

After the crash, which occurred at Hillside boulevard and Bismark street, Harris made a U-turn and fled from the scene of the accident, it was alleged. Bail was set at $250 bond or $500 cash by Judge Wade H. Clay.

The hearing will be held at 3:30 Friday afternoon.

DEPARTMENT CHANGES MADE IN CITY SET-UP

Robert A. Klassen, former city engineer, this week resumed his duties here as part-time city engineer, superintendent of streets and head of the parks and playgrounds.

Simultaneously, Arthur J. Bodien, water superintendent, was reinstated as chief building inspector and purchasing agent for the city for the present time.

The changes followed a recent ordinance passed by the city council which abolished the office of full-time city engineer.

Klassen will be remembered in Daly City, where he had been affiliated with the engineering department since 1915. He served continuously in that capacity until April, 1939.

Klassen has spent more than twenty years in the service of Daly City and is thoroughly familiar with local problems. At the present time he holds the offices of part-time engineer for the towns of San Carlos and Belmont and for the Bayshore Sanitary district.

Water Superintendent Bodien is also thoroughly familiar with the two additional city departments that have been turned over to him, that of chief building inspector and purchasing agent. He held both these offices prior to the establishment of the full-time city engineer job, and is well qualified for these positions.

Came The G-Man, Then Came The Dawn

Young Charles Ferrando, 11 years old, went to see a movie at the Daly City theatre one evening last week.

He was wide awake during the thrilling gangster picture. He enjoyed the newsreel and the cartoon too, but when the love story came on the screen, Charles was bored.

So bored in fact, that he slumped in his seat, intending to take forty winks. The forty winks stretched into a hundred and forty, into two hundred and forty. The show ended, the customers left, but Charles remained in the comfortable seat dreaming of cowboys and G-men.

At three in the morning he awoke, and looked around. This was not his room at his home, 350 Irvington street. As he became conscious of his surroundings he remembered that he had fallen asleep just as the hero and heroine were going into a clinch.

Charles nonchalantly strode through the dark, deserted theatre and hammered on the door until he attracted the attention of a passer-by, who notified Daly City police.

The police returned him to his anxious parents at 4 a. m., no worse for his experience.

All-Stars To Play Thirtieth Infantry

D. C. Police Recover Stolen Automobile

Sergeant W. W. Sunderland and Officer A. J. Dalton of the Daly City police force, recovered a stolen car, early Monday morning, less than one hour after the theft was reported.

Belonging to John T. Bailey, 65 Alexander street, the car was taken from in front of 676 Brunswick street. Police found it a short time later, abandoned on Flournoy street, behind the Daly City theatre.

Rainbow decorations and music by Lembi's incomparable Indians of Rhythm will characterize this year's colorful Senior Ball, which will be staged Friday evening in the high school auditorium.

The event is open only to students, alumni and their guests.

County News

Migrants

San Mateo county's most publicized problem, that of the migrant laborers, grew more pressing this week as county officials were confronted with hordes of migrant farm laborers on the Coastside, with little prospect of employment.

At Half Moon Bay it is estimated that there is work for only 500 pickers, with 1600 in the camps waiting for the jobs.

Cut Worm Invasion

County Agricultural Commissioner Max J. Leonard announced last week that his men are working day and night to combat a 2000-acre invasion of cut worm which threatens serious damage to a $40,000 vetch crop in the Half Moon Bay area, which is threatening row crops of equal value, and has spread over the mountain to the Bay side of the county.

Banana Tree

Lending a touch of tropical charm to the scenery, a banana tree was reported to be in full bloom in the City of San Mateo this week.

On the tree are six little bunches of bananas, all wine-colored, according to the report. Several other banana trees near-by have not yet bloomed out.

Firing Range

Restriction of fishing and navigation in the Pacific ocean off the San Mateo county coastside north of Pillar point was in prospect today as the war department announced plans for establishing an artillery firing range in that area.

The triangular shaped danger zone under consideration would extend from Point Reyes on the north to Pillar point on the south, and as far out to sea as a north-south line running through the southeast Farallon island, according to Major R. C. Hunter of the army engineering corps.

Chevrolet Enjoys Wide Popularity

Since the introduction of its new model in October of 1939, Chevrolet Motor Division has produced 800,000 automobiles, according to announcement made this week by M. J. Soldavini, Belli Motor company, Daly City.

"This figure points clearly and unmistakably to the outstanding leadership in sales and popularity that Chevrolet holds in the industry," declared Soldavini, in reviewing the record-breaking mark that Chevrolet dealers throughout the United States have achieved. "Enthusiastically, the motoring public has accepted the 1940 Chevrolet as the most beautiful model we have ever produced. In styling, in appearance and in its host of modern conveniences and mechanical features, all three series of the 1940 Chevrolet—The Special DeLuxe, The Master DeLuxe and the Master 85—have been designed by our engineers to give the utmost in leadership performance and safe and comfortable driving.

"Because of its great popularity on our last year's models, exclusive Vacuum-Power gearshift, the shifting mechanism that does 80 per cent of the shifting work, is offered this year on all models," said Soldavini.

"Setting the pace in styling, also, the 1940 Chevrolet is available this year in many new and attractive colors and in two-tone combinations which are winning favor with motorists everywhere," Soldavini concluded.

Football Trophy

The John W. Heisman Memorial trophy is awarded each year to the football player deemed the most valuable. It perpetuates the memory of a football coach and gridiron mentor at many colleges for 35 years. The Robert W. Maxwell trophy, also awarded to the outstanding player, is named in honor of Robert W. (Tiny) Maxwell, a former all-America player, sports writer and gridiron official. The August V. Lambert Memorial trophy, emblematic of leadership among eastern gridiron teams, was donated by Victor A. and Henry L. Lambert of New York city in memory of their father, an ardent football fan.

Foreign Auto Ownership

Of all the countries in the world, only two—Ethiopia and Liberia—have as few cars per person as America did in 1900. They have one auto to 12,000 inhabitants.

Observe 100 Years of Quadruplet Life

A century of quadruplet life was celebrated yesterday when the Keys quadruplets of Waco, Texas, observed their twenty-fifth birthday. Once a year—on their birthday—the Keys sisters return to Hollis, city of their birth. Left to right: Roberta, Leota, Mary and Mona Keys.

Netherlands Defensive Flooding

If the dykes in the Netherlands are open, defense flooding would damage the farm lands, and necessitate the evacuation of thousands of residents, but the water would not be sea water, it would be fresh water from the rivers, or the old Zuyder Zee, now called Ijssel lake. It would do no permanent harm.

What an Animal!

The biggest land mammal that ever lived is called a Baluchithere. Its bones were found by the American Museum of Natural History on one of its expeditions to Mongolia. This prehistoric beast must have been able to browse on leaves more than 25 feet above the ground, according to measurements of its reconstructed skeleton.

Ghetto in Amsterdam

Probably no Ghetto in Europe has more American visitors than the one in Amsterdam. They come to No. 41 Waterloo Plein to see where Spinoza was born, and to the house at No. 4 Jodenbree street where Rembrandt lived for 16 years.

Gasoline Taxes

American motorists paid more than $7,000,000,000 in gasoline taxes in 19 years after the first tax of this kind was levied. This is almost as much as the federal government requires for one year's running expenses.

Representative John Z. Anderson from the eighth congressional district of California recently announced that the War department has just completed plans for the substantial enlargement of army facilities in Monterey county and a substantial increase in the number of men that will be stationed there.

Buick Factory Delivery Plan Effects Saving

Not so many years ago it was quite an adventure to make a transcontinental trip in an automobile, but now with trouble-free motor cars and all-paved super highways, served by almost innumerable modern, comfortable tourist courts or motels, a cross country motoring jaunt is a common every-day occurrence and creates no more than passing interest.

With the ease and enjoyment of transcontinental motoring impressed upon the motoring public, there has been a marked increase this year in factory deliveries of new cars to California purchasers. M. J. Soldavini, Belli Motor company, local Buick dealer, reports that approximately twenty-five per cent of the Buick buyers in California are now traveling back to Flint, Michigan, by rail, bus or plane and picking up their new car at the Buick factory. According to Soldavini, the Buick factory delivery plan effects a saving in car price for the purchaser of sufficient amount to pay his fare east and the normal expenses of a vacation tour of the eastern and midwestern states en route home.

"The Buick factory delivery arrangement particularly appeals this year because of the reopening of the New York World's Fair. The tourist has the choice of several interesting routes home, such as the direct Overland Route, the scenic northern route, and the romantic southern and border routes."

Three Troubled Rulers 'Celebrate' Anniversaries

Rulers of three gravely troubled European nations will "celebrate" anniversaries during the next few days, but in a much different manner than in former years. King George VI of England, right, will celebrate his birthday Thursday, June 13. Though his birthday actually falls on December 14, English custom sets the date for his anniversary.

Precious metals are recovered from the sludge of copper refineries, says Industrial and Engineering Chemistry. Cadmium is a by-product of zinc smelting. "How A College Education Will Help Me To Adapt Myself To Life"

By Charlotte Weait

(Editor's Note: The Daly City Record presents below the essay of Charlotte Weait, who won first place in the State for her essay. Since the thoughts and aims of the youth of the community cannot fail to be of interest to the community as a whole, The Record wished to present this article.)

The value of a college education? I'd say it was limitless.

When I go to college—and I am going—I shall have to act entirely on my own initiative, because circumstances at home make it impossible for my parents to give me any assistance. And I am looking forward eagerly to those years of work and study as the most productive experience of my life. College, to me, has always meant a wonderful place, where I should find the way to make all my dreams come true. It spells the path to things and people that count.

The youth of today is a youth bewildered by problems that its parents never had to face. It is thrown out in the world entirely defenseless. Any thinking person will agree that those four precious college years are invaluable in establishing mental balance.

Any native ability the student possesses is developed as far as possible. Instead of going to waste, it is made into a valuable asset. The student is taught to make the most intelligent use of it. He gets the specialized training that is so necessary for advancement in the business world of today.

His horizon is broadened because he is, primarily, taught to think. His brain becomes so active that it will be impossible for him in after life to sink into the petty routine of everyday living. Through continuous study he is forcibly shocked out of his complacent stodginess. With fine, expertly trained minds giving of their best for his benefit he gains something that will last him the rest of his life. He is enabled to explore to its utmost depths the world of literature and art, and music and science. At no other time in his life will he have the opportunities for mental growth that he has in his college years.

Because he has to work to his utmost capacity, he learns the value of a single, paramount objective. His mind becomes trained to obey his will. His thinking becomes orderly and systematic.

The college student forms social contacts that are stimulating and varied. He can choose his friends at leisure. His friendships are formed, not merely thru propinquity, but thru common interest, shared ambitions and ideals. His contacts will be with the people who have gone there for the same reasons he has. He will seek out his kindred spirits. Friendships born in college are usually lasting and productive.

These are all obvious advantages of a college education. But to me it stands for something still more. I want a college education for my own personal satisfaction.

From time immemorial man has striven for something better. He has striven for ways in which to perfect his own life, and the lives of his contemporaries. He has studied endlessly, and delved deeply into his own heart and mind for the why and wherefore of things. And he has learned that education is the one thing that is enduring. "Education elevates man." It develops the young minds of today into the leaders of tomorrow. And most of all it teaches a man to live with himself. If a person has all the luxuries money can buy, and still is not able to enjoy solitude, and find it fruitful, he cannot be truly happy. A bored person is a barren person.

It is not what he achieves in worldly things that counts, but his ability to adapt himself to unfavorable surroundings. And education teaches him to welcome solitude, not to fear it. It teaches him how to call on his inner resources to keep him happy and useful and beloved.

As compared with the person who leaves high school and takes a poorly paid job because he "can't afford" any more school, the college graduate's life is infinitely richer. He adapts himself to life, and to people and circumstances. His general background has broadened far beyond the ordinary scope of vision. He is able to view the world with a vastly more tolerant view point than if he had gone immediately to work in a job for which he was not fitted, just because it was the only thing available. So many fine talents have been wasted, so many lives embittered because the person was in too much of a hurry for life to take time off to learn how to live.

More than anything I want a career. And yet, if I do not succeed in the thing I have chosen to do, I shall not be miserable. I shall be happy in obscurity because I shall know how to be interested in things. I will be interested in people, and become constantly more alive to the world about me. And people will be interested in me because I will have something worth while to offer.

Of course, there is always the scoffer, who says "And when you've got your diploma, what good does it do you? Lok at all the time you've wasted!"

Wasted! Who can count the inestimable value of that diploma? So much has been gained in factual knowledge, in understanding and tolerance, and clear reasoning. So many happy hours have been spent in studying arduously, in toiling zealously toward the goal of perfection. The knowledge that he has aimed for something and accomplished it enables the student to face the future confidently. He may be obscure, yes, but never mediocre. And all the rest of his life he will be reaping the benefits of those four years of concentrated effort.

Daly City Community Players, accompanied by Lembi's Cowboy band, entertained at an I.O.O.F. installation celebration, Saturday evening, in Pleasanton.

Chemical Energy Relationships

Today chemists without having to conduct a single experiment can frequently calculate whether a certain product can be produced from new and untried raw materials, the American Chemical society reports. Energy relationships are studied to learn whether or not an untried reaction will liberate free energy. Energy has a natural definite tendency to scatter, and this tendency provides the driving force of chemical reactions.

Rain Fails To Daunt Traveling Scouts

Seven scouts, accompanied by Scoutmaster Joseph Straughan, Troop No. 141, left Thursday morning for a two-day camping trip to the Nazarene church at Santa Cruz.

With Soya Bean II loaded to capacity, a call for additional transportation was sent out. It was answered by Committee Chairman Neal Edwards, who helped take scouts and duffel to their destination.

Rain prevented outside activity on Thursday, but the scouts were prepared. They had ping-pong and other games with them and enjoyed themselves indoors.

Sunshine on Friday permitted baseball and swimming, and an hour's work was devoted to the church grounds. Meals were cooked on a camp range. As the troop was billeted in a dormitory, tents were not pitched.

Highlights of the meals were cookies by Richard Russell, a confection which is fast becoming a legend in local scouting circles. Friday the boys were invited to a picnic which was thoroughly enjoyed.

Soya Bean was loaded for the return trip Saturday morning and the Scouts arrived home at noon. Making up the camping party were Glenn Goode, Richard Russell, Paul Underhill, Bill Reardon, George Fair, Jimmy Meidl, Tommy Tromberg and Scoutmaster Joseph Straughan.

Beginnings of Kindergarten

Maria Montessori, the Italian educator, studied at the University of Rome and graduated in medicine in 1894, being the first woman in Italy to do so. She then took up the subject of educating defective children. From the experience thus acquired, she came to the conclusion that similar methods might be applied to normal children of a lower age, and after a series of experiments on a small scale she extended them to a large number of children in private and public nursery schools in Rome. Her ideas on education have been set forth in several books which have been widely translated.

Neptune's Racecourse

Omey island, a short distance off the west coast of Ireland, is not an island at all at low tide. Then it is connected with the mainland by a bed of sand packed so hard and smooth that horse and cycle races are frequently held where the sea has rolled only a few hours before.

'A Dog's Tale'

Mark Twain's "A Dog's Tale" was first published in Harper's magazine in December, 1903. Subsequently it was privately printed by the National Anti-Vivisection society. In 1904 Harper's brought out the story in book form.

A jellied shrimp and vegetable salad is delicious as a main course dish on a warm day

JELLY is jolly for a warm day —and jellied meat dishes are both nourishing and cool to eat

Dorothy Greig

JELLIED dishes are the dishes that permit us to be out among the birds and flowers on a summer day. For, early in the morning, we can put together our jellied mixture, shut the refrigerator door firmly on it, and blithely banish all thought of it until meal time.

Also, a jellied meat, fish or vegetable is a gladsome dish to set before the Heated. Its gentle quiver promises coolness; its lively seasoning spurs appetite; and its honest heartiness satisfies.

The recipes for these two main course jellied dishes call for quantities sufficient to make eight servings—in preparation for that demand for second helpings:

Jellied Shrimp and Vegetable Salad

1 can condensed consommé
1 tablespoon gelatine (soaked in ¼ cup cold water)
⅝ cup water
½ teaspoon salt
Pinch white pepper
3 tablespoons lemon juice

Sprinkle the gelatine on the cold water and let it stand for at least five minutes. Heat the consommé to boiling point and pour over the gelatine, stirring until dissolved. Then add ⅝ cup cold water, salt, pepper and lemon juice.

1 pound fresh shrimps
1 cup cooked green peas
½ cup diced celery
1 hard-cooked egg for garnish

Cook the shrimps in boiling salted water with stalk of celery and sprig of parsley for 15 minutes. Drain and cover with cold water to chill, then drain, remove shell, legs and intestinal vein (the black line running along the back.)

To fix up the mold: Pour a small amount (¼ to ½ cup) of the seasoned consommé in the bottom of a mold and place in refrigerator until firm. Then place whole shrimps and hard-cooked egg slices alternately in the jelly. Pour over enough of the seasoned consommé to cover shrimps and egg slices and place in refrigerator until firm. Then cut the remaining shrimp into small pieces and combine with cooked peas, diced celery and remaining consommé. Pour into the mold and place in the refrigerator. When firm, unmold on a garnish of lettuce, watercress or chicory. Serves 8. Serve with salad or mayonnaise dressing.

Jellied Ham and Chicken Loaf

2 tablespoons cold water
1 tablespoon gelatine
1 can condensed consommé
3 tablespoons lemon juice
2 cups ground cooked ham
1 cup ground chicken
4 tablespoons mayonnaise
¾ teaspoon salt
1 pinch pepper
3 eggs (hard-cooked)

Sprinkle the gelatine on the cold water and let soak for at least 5 minutes. Then dissolve with the hot consommé and add the lemon juice. Pour 3-4 tablespoons of this jelly in the bottom of a loaf pan (7½"x3½"x3") and let it partially set, then garnish with rings of stuffed olives, pimiento or hard-cooked egg slices and set aside until firm. When the remaining consommé is partially set add the ground ham, ground chicken, mayonnaise, salt and pepper and mix thoroughly. Put ⅓ of meat mixture in the bottom of the loaf pan, put in the three hard-cooked eggs, arranging end to end through the center of the loaf. Cover with the remaining meat mixture and put into the refrigerator until set. Turn out on cold platter and garnish with greens. Serves 6-8.

Rome's World Fair

A mammoth aluminum arch 325 feet high and with a span of 756 feet will be the theme center of the Rome 1942 Universal exposition. It will be the biggest construction project ever attempted completely in light metal and will be built of aluminum made in Italy. The arch will be built with steps and fair visitors who enjoy climbing will be able to scale the highest point of the arch for a panoramic view of the Rome fair.

Tomato-Growing Champion

Lynchburg, Va., where Thomas Jefferson taught the public that the tomato was good to eat, now boasts a tomato-growing champion. W. E. Martin, the champ, produced a tomato plant which grew to a height of 12 feet in his back yard.

Record Size Salmon

The largest salmon ever caught in southeastern Alaska weighed 120 pounds. The fish was 53½ inches long and 36½ inches around. It was caught in a net. The previous record salmon weighed 116 pounds.

Most Favored Nation

Under the amended 1930 Tariff act every nation is entitled to any reduction in duty given to any other nation, unless the President proclaims that a certain country is discriminating against our commerce. Such a proclamation was made by the President in regard to Germany. Germany is the only country to whom the most favored nation tariff policy is denied.

Australia's Wool Production

With Australia's wool production increased from 143,300 bales 11 years ago to 238,000 bales now, the country remains its own third best customer. Only France and Great Britain purchased more Australian wool last year than did Australia.

Proper Electrical Service

The home owner, when buying electrical equipment, is cautioned by the Federal Housing administration to bear in mind the type of electrical service he is to receive, as many electrical appliance usable on direct current will not operate on alternating current. Localities where direct service is supplied are declining, but it is still a factor.

Treaty of Ghent

At Ghent, in Flanders, on December 14, 1814, the famous peace treaty was signed which formally declared at an end the War of 1812 between England and the United States. News of the treaty did not reach this country until February and fighting was still going on in Louisiana.

Vacation Time's For Mother, Too!

Ronnie, home from junior college takes a Ph. D. for excellence in soiling socks and sweaters.

Whilst, the youngest two on skates aspire to make a mountainous pile of dirty frocks and jumpers.

And Picnics! Yes, they're fun—if one ignores the heap of grass-stained play-clothes and blackened tablecloths.

Even father, patient soul, cavorts with Bill and Sue and turns in six shirts instead of two.

But vacation's still for mother... she sends that laundry right to us and forgets the grief and worry.

Hilarious Farce Will Star Joan Blondell

Those who have seen "Goodbye To Love" in which the veteran showman, A. H. Woods, maker of stars and hit plays, is starring Joan Blondell, in her return to the legitimate stage for the first time since she became a film luminary, are a unit in saying Woods is up to his old tricks—making audiences laugh with his exuberantly funny and daringly risque farce comedies.

Al Woods has produced so many rollicking farces that he says he's lost count, and now that he's announced that in the future he'll make all his productions on the West Coast, theatregoers can look forward to a season of laughter, because Woods insists he prefers producing farces to all other types of theatre fare.

Likewise, he believes "Goodbye To Love" which comes to the Geary theatre for a limited engagement beginning Monday, will make the house ring with laughter. He believes the public wants to, needs to laugh right now, and he hopes to produce that laughter—on the stage.

Woods calls "Goodbye to Love," a rollicking, frolicking, naughty but laughing farce comedy. Sheldon Davis is its author. The effervescent star, Joan Blondell, is surrounded with a distinguished cast including Patric Knowles, Colin Campbell, Charles Gary, Hattie Noel, Douglas Wood, Connie Emerald and Bernadine Hayes. John Hayes has staged the play for Woods.

1940 Ice Follies Display Grace

Beauties of grace and rhythm, blended with skill and masterful showmanship, are being unfolded nightly by the Ice Follies of 1940, at Winterland, in San Francisco.

Different from a stage production because the entire ice rink is the stage and different completely from last year's sensational show, the new Ice Follies is attracting capacity audiences, it was announced.

Most elaborate production number is the "Arctic Fantasy," which introduces the 1940 edition of the ice extravaganza.

This spectacular opening combines the full forces of the cast of 65 into a colorful prelude. Taking place in a far-North setting of igloos and northern lights, one group of blade ballerinas simulates the splendor of the Aurora Borealis by means of 30-foot streamers of vari-colored china silk.

Humor is added to the opening number by three bears, portrayed Polar style and a Snow-man eight feet tall, characterized by Harris Legg. Another comedy feature of "Arctic Fantasy" is the satirical ballet on skates by Les Hamilton in the role of "Miss Snowflake." Hamilton's entrance is made on a dog sled escorted by a red-garbed Canadian mountie.

Satire and National Life

Satire, like the poet's Lily of Malud, is born of corruption; and the "secret mud" that generates it is full of poisonous germs of suspicion, envy, hatred, malice and all uncharitableness. In the literature of a nation satire is generally one of the latest forms of self-expression to be developed and brought to perfection. For the natural impulse of literature, and especially of poetry, is the celebration of what is beautiful and revered.

Girl Telephone Employees

The telephone company states that although male operators were used when switchboards were first put into service, it was soon found that the temperaments of men were not suited to such work, so in a comparatively short time they were replaced by girls. Since that time it has been the policy of companies to employ only girls.

Height of Chimneys

Height plays a considerable part in the efficiency of a chimney, many authorities maintain. For this reason, chimney heights of 30 to 35 feet as a minimum are recommended. Any arbitrary minimums must be considered in the light of local conditions, however, as overhanging trees, the height of the chimney above the roof, and strong prevalent winds can cause disturbance in the draft action.

His Hat in the Ring

"Mahatma" Bailey, assistant football coach at Washington State college, was married recently, reports the American Magazine, and among his wedding presents were 26,000 old hats sent by his alumni friends. They all remembered that Bailey has a habit of throwing his hat down and jumping on it whenever his team faces a critical moment in a game.

In the American army the 16-inch gun has the longest range, approximately 30 miles. The Paris guns used in the bombardment of the city of Paris during the World war had a possible maximum range of 79.5 miles, the longest range of any gun known.
